

What is claimed is:

1. A wind-proof umbrella having a Y-shape wire including a normal shaft, a runner, a main rib, and a branch rib; the characteristic is to provide a ring on the shaft at an upper position, a Y-shape wire being provided to connect its inner end to the ring and its two outer ends to two nearby main ribs, in order that each main rib is connected with two Y-shape wires.
2. A wind-proof umbrella having a Y-shape wire as claimed in claim 1, wherein the applied umbrella is an automatic umbrella and a spring is provided under the ring that pushes the ring upward as the umbrella is closed.
